INDEX TO VOLUME XLVIII

[NOTE.—In this index the titles of principal papers and headings of departments, as *Discussions,* are in italics.]

Abstracts—
Accumulation of minor-elements in coal ash and its economic implications (Stadnichenko), 332
Acetonic dithizone in geochemistry (Warren, Delavault, and Irish), 306
Alteration associated with ore at Gaspe Copper Mines (Bell and Scott), 616
Application of geology to the discovery of zinc-lead ore in the Wisconsin-Illinois-Iowa district (Agnew), 322
Approaches to the study of lead-zinc gossans (Kelly), 622
Base metal deposits of northern New Brunswick (Mackenzie), 624
Beryl deposits in the Harding pegmatites, Taos County, New Mexico (Jahns and Adams), 328
Biogeochemical investigations in Finland (Marmo), 211
Cobalt-arsenic minerals associated with aplites at Cobalt, Ontario (Sampson and Hriskevich), 628
Commercial synthesis of star sapphires and star rubies (Frondel), 325
Comparison of megascopic and microscopic examinations of coals (Somers), 628
Copper shales of Germany and Michigan (White), 631
Coppermine River area, Northwest Territories, Canada (Jenney), 621
Definition of a mineral belt in south central Colorado (Gabelman), 177
Deposition of high temperature nonmagmatic magnetite (Holser and Schneer), 620
Dimension stone in the United States in 1952—A summary (Deiss), 324
Dimension stone industry of California (Norman), 330
Distribution of uranium deposits in the Shinarump conglomerate of the Colorado Plateau (Finch), 619
Domestic graphite supply problem (Cameron), 323
Emerald, Feeney and Dodger tungsten ore-bodies, Salmo, British Columbia (Ball), 615
Engineering study of glacial deposits at Steep Rock Lake, Ontario, Canada (Legget and Bartley), 513

Abstracts—Continued
Field method for the determination of titanium in rocks (Shapiro and Brannock), 282
"Fossil" geochemical anomaly near Jerome, Arizona (Huff), 327
Fracture pattern and uranium ore of the Zuni Uplift, New Mexico (Bucher and Gilkey), 617
Genesis of California talc (Wright), 333
Geochemical association of niobium (columbium) with titanium and its economic significance (Fleischer), 324
Geochemical prospecting for copper at Ray, Arizona (Clarke), 39
Geochemistry and origin of the gold-bearing quartz veins and lenses of the Yellowknife greenstone belt, Northwest Territories, Canada (Boyle), 617
Geologic associations of niobium in the United States (Kaiser), 622
Geologic character of typical pitchblende veins (Everhart and Wright), 77
Geologic importance of variations in stable isotopic abundances (Jensen), 161
Geology and geochemistry of base metal deposits (Wilson), 370
Geology and ground-water conditions in the lower valley of the Rio Elqui of Chile (Jones), 457
Geology and ore controls at the Guadalupe mine, Nuevo Leon, Mexico (Whiting), 631
Geology and ore deposits of the central portion of the Labrador Peninsula (Staff of Iron Ore Co. of Canada), 625
Geology by Campbell Red Lake Mines Limited [Ontario] (Jarvis), 621
Geology of coal in Alberta (Crockford), 618
Geology of the Mindamar mine, Stirling, Nova Scotia (Richardson), 627
Geology of the Radium Hill Uranium mine, South Australia (Parkins), 626
Grading of natural corundum ores (Carl, White, and Hockman), 323
Half century of dimension granite quarrying in Massachusetts (Fletcher and Mould), 325
Hydrothermal rock alteration at Wairakei, New Zealand (Steiner), 1

Abstracts—Continued
Iron deposits of the Congonhas district, Minas Gerais, Brazil (Guild), 639
Iron ore at Bomi Hill, Liberia (Fitzhugh), 431
Jersey Dodger lead zinc ore bodies, Salmo, B. C. (Whishaw), 630
Lithologic ore controls in sandstone type uranium deposits, Colorado Plateau (Wright), 632
Metamorphic differentiates in the Blackbird mining district, Lemhi County, Idaho (Roberts), 447
Metamorphism of coal by peridotite dikes in southern Illinois (Clegg), 618
Methods used in geochemical prospecting analytical laboratory (Bloom), 322
Mining and milling of lithium pegmatites at Kings Mountain, North Carolina (Goter, Hudspeth, and Rainey), 326
Molybdenum bearing granite and granodiorite, Rautio, Finland (Marmo and Hyvarinen), 704
Monazite deposits of the southeastern Atlantic States (Mertie), 330
Morton granite gneiss (Lund), 46
Notes on the differential leaching of uranium, radium, and lead from pitchblende in H_2SO_4 solutions (Phair and Levine), 358
Notes on the silica problems of the bed rock ore deposits (Schmitt), 628
Occurrence, distribution and weathering of pyrite in coals from the Sydney coalfield, Nova Scotia (King), 623
Ore textures of uraninite and associated minerals from the Colorado Plateau uranium deposits (Miller), 625
Origin of alunite deposits at Pidinga, South Australia (King), 689
Origin of the chromite deposits of the Bay of Islands igneous complex, western Newfoundland (Smith), 408
Outbursts in coal mines (Ignatieff), 620
Paragenesis of the zinc-lead-copper deposits at the Mindamar mine, Nova Scotia (Watson), 630
Pegmatitic lithium deposits of Canada (Rowe), 627
Petrographic examination of washed, screened, and crushed samples of coal from the Sydney and St. Rose coalfields, Nova Scotia (Hacquebard and Lahiri), 619
Petrology of the Salem limestone (Indiana building stone) (Patton), 331
Polarization figures and rotation properties as applied to the identification of some cobalt nickel sulfarsenides and related minerals (Hutchinson), 492
Polishing phenomena in the copper sulfides (Wandke), 225

Abstracts—Continued
Qualitative color test for rapid identification of the clay mineral groups (Hambleton and Dodd), 139
Quarry practices in the Indiana building stone industry (Letsinger), 329
Radioactive, pronouncedly differentiated pegmatite sill, Lac La Ronge district, northern Saskatchewan (Mawdsley), 624
Radioactivity of rivers and lakes in parts of Garland and Hot Spring Counties, Arkansas (Arndt and Kuroda), 551
Reconnaissance of superficial phosphate deposit near Minas, Uruguay (Eckel and Milton), 437
Relation of oxidation to the origin of soft iron ores of Michigan (Mann), 251
Relation of pH and oxidation potential to sedimentary iron mineral formation (Huber and Garrels), 337
Review of physico-chemical data on the state of supercritical fluids (Smith), 14
Review of the Falconbridge ore deposit (Lochhead), 623
Rock bursting and other geologic problems in the granite quarries at Barre, Vermont (Jahns), 328
Significance of Pleistocene deposits in the ground-water resources of Illinois (Foster), 568
Sketch of the geology and ore deposits of Baja California, Mexico (Wisser), 333
Some biogeochemical investigations in eastern Canada (Warren and Delavault), 629
Some considerations regarding liquid inclusions as geologic thermometers (Skinner), 541
Some geologic features of a potash deposit (Jones), 329
Some recent American developments in geochemical prospecting for minerals (Hawkes), 327
Sources of error in the measurement of rotation properties with the ore microscope (Cameron, Hutchinson, and Green), 574
Steatite deposits of Bheraghat, Jabalpur district, M. P., India (Chhibber), 53
Structural and decrepitation features of the gold mineralization at the O'Brien mine, Quebec (Blais), 616
Structural conditions in coal mines of the southern Canadian Cordillera (Norris), 625
Structural setting of the Coeur d'Alene mining district, Idaho-Montana (Wallace and Hobbs), 629
Study of lead sulfide solubility and its relation to ore deposition (Hemley), 113

Abstracts—Continued
Textural pattern of the serpentines (Nagy), 591
Tracing of glacial boulders as an aid to ore prospecting in Sweden (Grip), 715
Ulvöspinel and its significance in titaniferous iron ores (Ramdohr), 677
Use of geology in developing the Blackbird cobalt-copper deposits, Idaho (Vhay), 332
Variation of low temperature decrepitation of quartz from the No. 6 vein of the Lamaque gold mine, Quebec (Smith), 628
Wall rock alteration in northwestern Quebec (Price), 626
Water soluble salts in limestones and dolomites (Lamar and Shrode), 97
Acetonic dithizone in geochemistry (Warren, Delavault, and Irish), 306
